FuturMaster

UNLEASH COMPLEXITY

TURN IT INTO COMPETITIVE ADVANTAGES WITH FUTURMASTER

OUR VISION

Today's world is characterized by uncertainty and hyper-volatility. This new reality disrupts the market status quo for any business sectors.

There are opportunities and high risks for companies. New contenders will emerge, challenging established leaders.

To effectively manage uncertainty and hyper-volatility, companies need to plan closer to end consumers and leverage their entire supply network, from primary suppliers to final customers.

Attempting to apply the same processes and technology to forecast consumer demand would lead to an impractical increase in demand planners and associated costs.

To truly transform a supply chain into a more agile, resilient, and cost-effective supply network, companies must be equipped with the right technology. Without it, they risk being overwhelmed by complexity.

- Processing massive volumes of data
- Supporting automated data cleansing
- Leveraging external variables that impact sales by determining the best-fit effects

Similarly, to unlock agility and resilience, companies need technology that can fully utilize the possibilities within their supply network. This includes:

- Smart algorithms for global optimization
- Vertical integration of long, mid, and short-term planning, inheriting higher-level decisions
- Horizontal integration and consistency accross the extended supply network

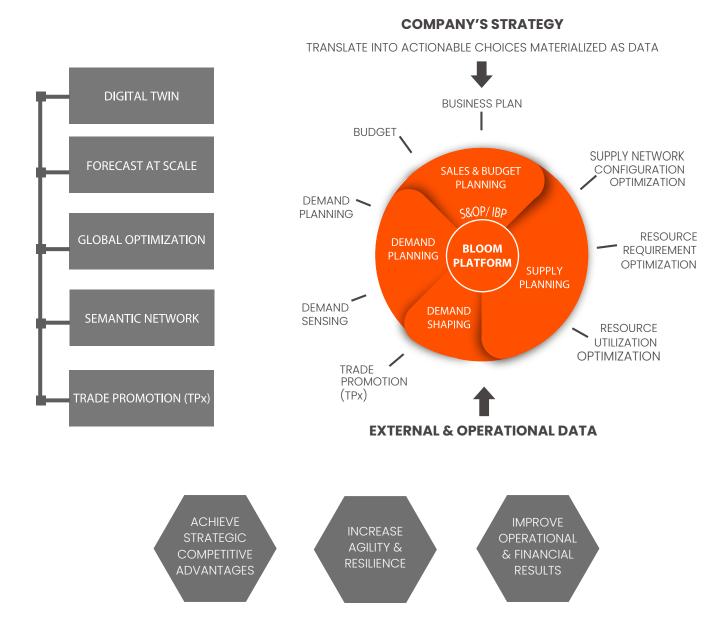

AT FUTURMASTER, WE BELIEVE THAT BY UNLEASHING COMPLEXITY, COMPANIES CAN TURN IT IT INTO COMPETITIVE ADVANTAGES.

THIS REQUIRES THE RIGHT TECHNOLOGY.

OUR BLOOM PLATFORM

FuturMaster Bloom platform enables companies to unleash the complexity inherent in their industry and turn it into competitive advantages.

Thanks to Bloom, companies can build horizontally-integrated optimized plans that take into account the extended supply network.

The Bloom platform also builds vertically-integrated long-term, medium-term and short-term sales, demand and supply plans aligned with the company's strategy.

AT A STRATEGIC LEVEL, THE BLOOM PLATFORM ENABLES OUR CUSTOMERS TO:

- Execute their company's strategy* by translating it into actionable choices, materialised as data
- Translate the company's go-to-market strategy into a 3-5 year sales plan
- Optimise the supply network's configuration

*The company's strategy includes:

Go-To-Market: What Product To Which Clients In Which Territory Via Which Channels At What Price

Target Service Levels

Business Priorities:

Products/ Clients/ Channels/ Territory Priority Rules

Business Success Criteria: Maximize Service Level, Maximize Revenue, Maximize Margin or Minimize Total Cost-to-Serve

FOR THE MEDIUM-TERM AND SHORT-TERM HORIZONS, BLOOM ENABLES OUR CUSTOMERS TO:

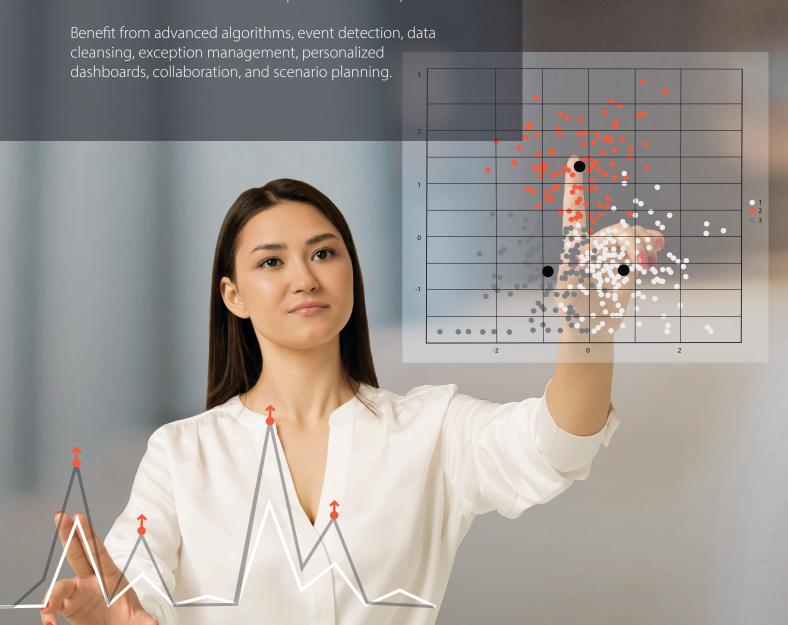

- Manage demand planning and demand sensing
- Establish the budget for the next year based on the demand plan combined with the
 3-5 year sales plan
- During the year, if there is a gap between the budget and the latest demand plan, fill the gap by leveraging trade promotions activities to achieve business targets
- Define the mid-term production plan and the purchasing plan
- Optimize the resource requirements plan to meet the sales in the mid-term based on the supply network utilization inherited from long-term planning
- Optimize the resource utilization to meet sales in the short-term based on the resources planned during the mid-term planning phase, as well as supply network optimization for this period

Thrive in a VUCA world with FuturMaster Bloom Demand Planning. Unleash complexity, turning it into competitive advantages.

Our solution leverages advanced Forecast at Scale technology to incorporate large amounts of internal and external data for accurate and responsive demand plans.

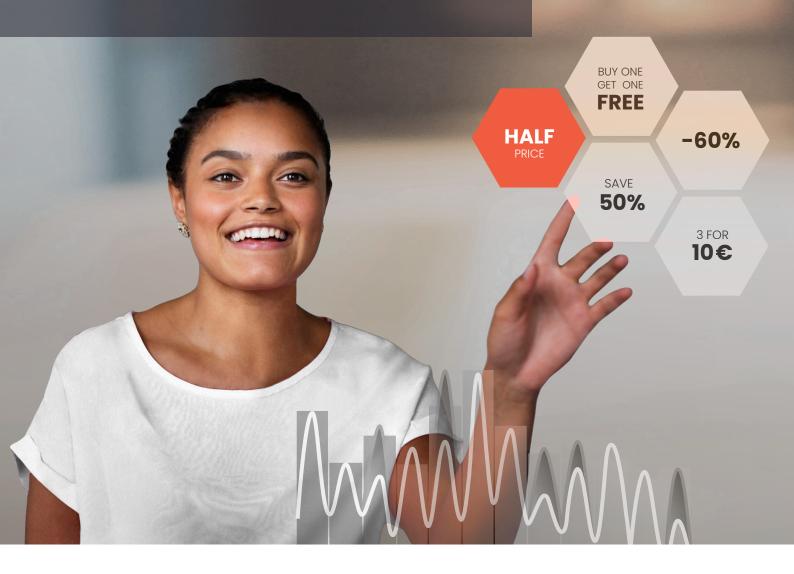

BLOOM TRADE PROMOTIONS X

Achieve your business targets with FuturMaster Bloom Trade Promotion & Optimization (TPx) solution. Transform trade promotion management and drive sales by leveraging advanced ML and Al algorithms.

Bloom TPx predicts uplift, calculates cannibalization effects, and optimizes return on investment, enabling informed decision-making. Key features include Al-powered insights, cannibalization rate calculations, dynamic dashboarding, and scenario planning tools.

Elevate your trade promotions strategy!

OUR DIFFERENTIATORS

FuturMaster's uniqueness lies in a combination of technology, data and business expertise.

OUR TECHNOLOGY ENABLES OUR CUSTOMERS TO UNLEASH COMPLEXITY:

- With Machine Learning and Forecast at Scale technologies at its core, Bloom Demand Planning enables you to make accurate demand plans capable of leveraging unprecedented volumes of data
- Bloom Supply Planning relies on digital twin modelling and global optimization algorithms to leverage all the possibilities of your extended supply networks to determine the optimal supply network configuration and supply plans to achieve business success
- Bloom Trade Promotions X technology allows you to manage and optimize trade promotion activities

OUR DATA-DRIVEN APPROACH ENABLES THE TRANSLATION OF STRATEGY INTO ACTIONABLE CHOICES, MATERIALIZED AS DATA:

Company strategy

Company business success criteria

Extended supply network

OUR BUSINESS EXPERTISE ENABLES US TO IDENTIFY THOSE DECISIONS NECESSARY TO ACHIEVE OUR CUSTOMERS' BUSINESS OBJECTIVES. THEN WE BUILD BEST-FIT SOLUTIONS TO IMPROVE AND OPTIMIZE THESE DECISIONS.

Our approach helps our clients achieve business success by gaining competitive advantage, agility and resilience while reducing total cost-to-serve

OUR CUSTOMERS

OUR CUSTOMER COMMUNITY COVERS MORE THAN 600 CUSTOMERS IN ALL INDUSTRIES

PROCESS MANUFACTURING INDUSTRIES

PACKAGED FOOD

ALCOHOLIC DRINKS

BEAUTY

ENERGY

DISCRETE MANUFACTURING INDUSTRIES

RETAIL INDUSTRY

WE ARE TRUSTED BY WORLD'S LEADING & FAST GROWING COMPANIES
